

Delivering Roads

ADB

ADB Support to Road Development

Physical Investment

- Main ADB transport lending
- 1,300 km of expressways, 39,000 km of national highways, and other roads benefiting 422 million people

Capacity Development

- Modernization of road sector institutions
- International best practices
 - Safety, technology, overloading control, planning, road asset management, business processes, contract management, safeguard, etc.

ADB Value Addition

Confidence of contractors

- Fair/ transparent bidding process, smooth payment, etc.

Quality roads

- Safety, environmental and social considerations, etc.

Safeguard Implementation

Capacity building in parallel with physical investment

Emerging Areas Relating to Roads

Regional Cooperation and Integration

- Coordinate/ facilitate road development among countries for regional impact

Climate Change

- Explore adaptation and mitigation measures

Financing Modality

- Coordinate/ cofinance with development partners; catalyze private sector financing

Clients' Expectation with ADB

Clients and ADB to deliver quality roads TOGETHER

- Areas to focus on
- Approach
- Country- specific needs/ challenges
- Knowledge and experience sharing among countries

Presentations Today
